

Cal/Amp® Telematics Cloud™

5.41 Release Notes

5.41 FEATURE SET

CalAmp Telematics Cloud (CTC) is proud to announce release 5.41, a production deployment for the CTC platform. Its new and enhanced features are described in this document.

NOTE: CTC system administrators assign user profiles to each user in an organization. Different features will be available to you based on these profiles, so you may not have permission to access everything listed in these notes. If you need to be able to use something you don't have privileges for, contact your CTC system administrator for assistance.

5.41 FEATURE SET 2

 Adding a Default Location Time Window to an RS Search Query 3

 Flushing Pending Device Commands 3

 Improved RGC and PSL 3

 Uninstalling TPMS Sensors 3

 Ongoing Security Improvements 3

Adding a Default Location Time Window to an RS Search Query

Going forward, if you don't apply a location time window for the Results Services event search API (such as `locationTime:[2025-12-02T00:00:00.000Z TO 2025-12-09T13:08:35.715Z]`), CTC will provide a default window of seven days.

Flushing Pending Device Commands

You can now clear pending device commands using the API DELETE `/devicecommands/{deviceId}`. The device commands will not be sent to the device, and the status will be updated to Canceled.

Improved RGC and PSL

We improved the map handling for RGC (*reverse geocoding*, which means using latitude and longitude values to report the actual address) and PSL (posted speed limit).

Uninstalling TPMS Sensors

We improved our smart trailer offering by adding the ability to delete multiple TPMS (tire pressure monitoring system) sensors for devices.

Ongoing Security Improvements

We continued our ongoing security improvements to stay ahead of current industry standards.

SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp's Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at solutionsupport@calamp.com.
