

Cal/Amp® Telematics Cloud™

5.47 Release Notes

5.47 FEATURE SET

CalAmp Telematics Cloud (CTC) is proud to announce release 5.46, a production deployment for the CTC platform. Its new and enhanced features are described in this document.

NOTE: CTC system administrators assign user profiles to each user in an organization. Different features will be available to you based on these profiles, so you may not have permission to access everything listed in these notes. If you need to be able to use something you don't have privileges for, contact your CTC system administrator for assistance.

5.47 FEATURE SET2

 Improved Data Pump Message Processing Performance3

 Expanded Google Pub/Sub Message Support3

 Enhanced Multi-Factor Authentication (MFA) Enrollment, Transition Handling, and Policy Enforcement3

Improved Data Pump Message Processing Performance

Enhanced Data Pump message processing to support higher throughput and faster response times during periods of heavy activity.

Expanded Google Pub/Sub Message Support

Enhanced Google Pub/Sub integrations by adding additional message attributes.

Enhanced Multi-Factor Authentication (MFA) Enrollment, Transition Handling, and Policy Enforcement

Added safeguards that prevent users from setting their own user type to Machine-to-Machine (M2M), and improved MFA account processing and user enrollment management to provide more reliable handling of MFA enablement, disablement, and account transition scenarios. These enhancements help ensure authentication and security policies are applied consistently across user accounts and remain consistently enforced.

SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp's Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at solutionsupport@calamp.com.
