# DM-CTC 3.21 Release Notes

## 3.21 FEATURE SET

### Improvement: File Metadata Backfill for File Size

A backend process was added to calculate and populate file size information for existing files by updating the `fileMetaSize` metadata, ensuring consistent file metadata going forward.

### Fix: Job Creation Now Uses Latest Reported App ID

Resolved an issue where jobs created from the **Jobs** page used the original manufacturing App ID instead of the latest reported App ID. Job creation logic and data synchronization have been updated to consistently use the most recent App ID across all job creation paths, ensuring accurate and consistent device configuration behavior.

## SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp's Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at [solutionsupport@calamp.com](mailto:solutionsupport@calamp.com).
