

DM-CTC 3.26 Release Notes

3.26 FEATURE SET

Improvement: Reduced DM Gateway Latency

Improved performance by reducing unnecessary response processing in DM Gateway, reducing API latency.

Improvement: Backend Reliability and Performance Enhancements

Implemented backend improvements to enhance system reliability and performance, including better handling of message processing failures, optimized retry behavior for concurrency scenarios, and connection pool tuning to support higher load and throughput.

SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp's Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at solutionsupport@calamp.com.
