DM-CTC 3.27 Release Notes

3.27 FEATURE SET

Enhancement: Latest Service Command Overrides Pending Commands

Updated service action (e.g. Enable, Disable) handling so that the latest command overwrites any previous unexecuted (pending) commands prior to device check-in. Commands already in progress (e.g., SENDING) are not overridden and will complete before subsequent commands are executed, ensuring correct sequencing of service state changes.

SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp’s Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at solutionsupport@calamp.com.
