

Cal/Amp® Telematics Cloud™

DM-CTC 3.31 Release Notes

3.31 FEATURE SET

Improvement: Modbus device file validation handling

Improved validation of Modbus device configuration files to detect and reject invalid formats, including unsupported delimiters and improperly formatted field values.

Fix: Resolved an issue with job rule engine retry handling

Resolved an issue where users might be prevented from retrieving files by ID caused by job rule engine API calls were not consistently retrying on failure.

SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp’s Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at solutionsupport@calamp.com.
