

DM-CTC 3.35 Release Notes

3.35 FEATURE SET

Enhancement: Added Vehicle Connection Status Visibility for Customer Administrators

Added access to vehicle connection status information for Customer Admin and Customer Admin Advanced roles within Vehicle Manager.

Improvement: Improved OTA Download Performance and Scalability

Improved the handling of OTA downloads by introducing dedicated processing designed to better support growing download demand. This will improve performance and reliability during firmware and file distribution operations.

Improvement: Improved Configuration File Validation Performance

Improved the performance and reliability of configuration file validation. Validation requests are now completed quicker and are less likely to experience delays or failures during periods of higher activity.

Fix: Improved VIN Lookup Reliability for Devices Using Alternate Identifiers

Resolved an issue where VIN Lookup requests could fail for devices using IMEI instead of an ESN. VIN Lookup operations now complete reliably across supported identifier types, reducing lookup failures.

SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp's Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at solutionsupport@calamp.com.
