

DM-CTC 3.38 Release Notes

3.38 FEATURE SET

Enhancement: Added Support for Cellular Network MCC Configuration

Added support for a new parameter (PEG Parameter 1542) that enables cellular network Mobile Country Code (MCC) settings to be included in configuration files for 32-bit devices. This enhancement expands available configuration options and supports more advanced network-specific deployments.

Fix: Resolved Duplicate Remote CAN Initialization Messages

Resolved an issue that could cause duplicate initialization messages to be sent to devices during remote CAN operations.

SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp's Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at solutionsupport@calamp.com.
