

DM-CTC 3.39 Release Notes

3.39 FEATURE SET

Enhancement: Added Support for Additional Cellular Modem Types

Added support for two additional cellular modem models:

- Quectel EG912U-GLAC Cat1 bis
- Telit FE910-5G RedCap

This expands hardware compatibility for supported devices and gives customers more flexibility when selecting radio hardware for new deployments.

Fix: Resolved Alphanumeric User ESN Display and Search Issue

Resolved an issue where devices using an alphanumeric-format User ESN (Mobile ID) were not parsed correctly, causing the value to display incorrectly or be missing from search results. Alphanumeric User ESNs now parse and display correctly, improving the accuracy of device search and identification.

SUPPORTING YOUR SOLUTION EVERY TIME. ALL THE TIME.

CalAmp does more than provide you with application services – we also supply you with an always-available resource for attention, answers, and insights if you have questions about your solution.

CalAmp's Technical Support team stands beside you to ensure that any concerns you have with any element of your solution – application, hardware, or operations – are addressed quickly and completely.

You can contact the Technical Support team via email at solutionsupport@calamp.com.
